George:

During our last meeting I pointed out that you eventually would have a need for additional spares to keep your depot stocked. We recommend that you avail yourself of the following Tracking Camera parts ('bits and pieces') for this purpose. We feel that this list, which is attached, is representative of the parts most likely requiring replacement. All of these parts are included in the Tracker spares kit. The quantities shown should cover you for one year's operation of twenty camera. The part numbers shown are those used by Wilson's people.

We would prefer to sell these in one lot and on an order separate from our current contract. All of the parts are peculiar to the Tracker and are not procurable from other sources since rework and assembly by us is required.

Our price for the lot is \$6186.00 subject to sixty days acceptance from this date. Delivery is five months from receipt of order. Packaging will be in separate, plastic bags, marked with the part number. Such packaging, you are aware, is satisfactory only for domestic shipment and storage.

We are preparing a similar quotation for Drift Sight Spares.

My secretary is ill and I am not too good on this machine.
